

Summary of SFFAS 29

Heritage Assets and Stewardship Land

This standard changes the classification of information reported for heritage assets and stewardship land provided by Statement of Federal Financial Accounting Standards 8. This standard reclassifies all heritage assets and stewardship land information as basic except for condition information, which is reclassified as required supplementary information (RSI). This standard requires that entities reference a note on the balance sheet that discloses information about heritage assets and stewardship land, but no asset dollar amount should be shown. Instead, the note disclosure provides minimum reporting requirements consistent with the previous standards for heritage assets and stewardship land. These requirements include a description of major categories, physical unit information for the end of the reporting period, physical units added and withdrawn during the year, a description of the methods of acquisition and withdrawal, and condition information.

This standard also requires two new disclosures for heritage assets and stewardship land. Specifically, this standard requires additional reporting disclosures about entity stewardship policies and an explanation of how heritage assets and stewardship land relate to the mission of the entity.

This standard also includes the requirements for the U.S. Government-wide Financial Statement. It provides for a general discussion and directs users to the applicable entities' financial statements for more detailed information on heritage assets and stewardship land.

This standard amends several existing standards. The amendments rescind certain standards or parts of certain standards due to the classification change, as well as serve as a means to incorporate all standards specific to heritage assets and stewardship land into one document.

Full implementation of the standards is effective for reporting periods beginning after September 30, 2008. Earlier implementation is encouraged.

Summary of SFFAS 30: Inter-Entity Cost Implementation
Amending SFFAS 4, *Managerial Cost Accounting Standards and Concepts*

This standard requires full implementation of the inter-entity cost provision in Statement of Federal Financial Accounting Standards (SFFAS) 4, *Managerial Cost Accounting Standards and Concepts*. By fully implementing the provisions in SFFAS 4 (issued in July 1995) this standard will require the following for inter-entity cost:

Each entity's full cost should incorporate the full cost of goods and services that it receives from other entities. The entity providing the goods or services has the responsibility to provide the receiving entity with information on the full cost of such goods or services either through billing or other advice.

Recognition of inter-entity costs that are not fully reimbursed is limited to material items that (1) are significant to the receiving entity, (2) form an integral or necessary part of the receiving entity's output, and (3) can be identified or matched to the receiving entity with reasonable precision. Broad and general support services provided by an entity to all or most other entities should not be recognized unless such services form a vital and integral part of the operations or output of the receiving entity. (Text preceding paragraph 105 of SFFAS 4)

This standard requires full implementation for reporting periods beginning after September 30, 2008.
